

City of Fountain Fountain Urban Renewal Authority

Olde Town and Interstate Gateway Design Guidelines

July 13, 2017

Location: City Utility Building, Community Conference Room

Steering Committee Meeting Number 2

Meeting Minutes

Kimberly began the meeting by welcoming everyone and thanking them for their time. Her introduction also offered a brief background on the project and how we arrived to this meeting.

Next, Sarah walked everyone through a brief recap of the last meeting and explained the changes that THK made to the context and circulation maps. Boards that were displayed at the recent Thunder in the Valley car show were presented to the Steering Committee.

At the June 6th meeting, the Steering Committee was asked to bring a photo that best represented Fountain to them. A discussion / presentation would be conducted at the next meeting.

Steering Committee Assignment

If you could choose one single photo to share with a friend or relative who lives out of state, that you think is the best representation of the City of Fountain: what would it be and why?

Please bring this photo with you to our next Steering Committee meeting

The Steering Committee members provided photos and commentary. Some brought more than one photo and there were many heartfelt stories of personal experience, family, community and history.

*Photos and notes are attached to this document.

Community Survey

A survey from the design team was shared with the Steering Committee and presented to the community at the Thunder in the Valley car show. The results of the survey were presented and briefly discussed with the Steering Committee.

*Photos and notes are attached to this document.

Next Steps

The next Steering Committee meeting will cover the topics of “What Makes A Great Place?”, “Place Making” and “Street Oriented Design”. We will cover elements of Great Places and what Place Making means by use of visual examples and discuss how these examples can be incorporated into our Design Guidelines document. A graphic demonstration of Street Oriented Design and how it can be incorporated into our Design Guidelines will be presented and discussed.

Next Steering Committee Meetings:

Wednesday, August 23, 2017
