Request for Bid (RFB) Woodman Hall Egress Stair Replacement Project 102 N. Main Street, Downtown Fountain CO

Woodman Hall was built in 1905, and as such, its imperative careful attention is paid to with upgrade materials construction and preservation of existing building materials is handled accordingly by the contractor.

The contractor will submit product and labor bid for performing service to the historic building located within the town center of Fountain, CO. The historic character of the property must be retained and preserved. Carefully remove and clean existing brick for salvage and reuse and return to owner. Protect all interior and exterior aesthetics during demolition and/or renovation work. Protect all interior flooring to salvage and reuse for finished interior work. Salvage & clean all removed brick, prep for new work. Provide temporary shoring for the existing structure during demolition until the new supporting structure is secured in place and/or approved through Pikes Peak Regional Building Department.
